DAVID OMETZ SUPERVISORY PATENT EXAMINER Continuation of 11. does NOT place the application in condition for allowance because: The arguments regarding claims 2-6,10,11,15,19-21,28,30 and 31 are not persuasive. See the attached detailed Advisory Action.

ADVISORY ACTION

Response to Arguments

1. Applicant's arguments filed February 16, 2006, with regard to claims 2-6, 10, 11, 15, 19-21, 28, 30, and 31 have been fully considered but they are not persuasive.

Regarding Applicant's arguments with respect to the rejection of claim 28 (and claims 5, 6, 15, and 29, which depend on claim 28), Applicant suggests that, "The illumination system in Olczak, therefore, appears to be of the type used for continuous illumination rather than for flash photography." However, part 28 is clearly labeled a *flash* control electrical circuit. A flash is "a sudden burst of light". MERRIAM-WEBSTER'S COLLEGIATE DICTIONARY 442 (Mish ed., 10th ed. 2001). One of ordinary skill in the art would therefore understand that a flash control circuit controls a flash and its illumination. Also of note is that the flash occurs "when the camera 10 is actuated" (see column 3, line 36). The rejection is proper, since Olczak fully anticipates the claim.

Regarding Applicant's arguments with respect to the rejection of claim 2 (and claims 3, 4, 10, 11, 19-21, 30, and 31, which depend on claim 2), Applicant is correct in noting that the advantage cited in the Office action is an advantage relevant to the embodiment shown in Figure 20 rather than Figure 18. Nevertheless, it would still have been obvious to one of ordinary skill in the art to have Olczak's camera use the red, green, and blue LEDs shown in Figure 18 of Kishimoto, since the separate colors allow one to control the color temperature of the flash (see column 13, lines 23-32, in Kishimoto). For this reason, the rejection is still proper.

Art Unit: 2612

2. Applicant's arguments, see page 10, paragraph 3, filed February 16, 2006, with respect to the rejection of claim 29 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Allowable Subject Matter

3. Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No prior art could be located that teaches or fairly suggests an LED flash for a camera that includes a booster device that boosts the output voltage of a battery to charge a large-capacity capacitor, wherein the energy from the capacitor is supplied to the LEDs.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Whipkey, whose telephone number is (571) 272-7321. The examiner can normally be reached Monday through Friday from 9:00 A.M. to 5:30 P.M. eastern standard time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Ometz, can be reached at (571) 272-7593. The fax phone number for the organization where this application is assigned is (571) 273-8300.
